One more thought-when do you think you will have the draft redline? I see reference to late May but is that what you were referring to? 2+ months seems like too long. Thanks...

Thanks David for all the info and congrats to all for what sounds like a success story! A couple of things to consider in response to the "to do" list that you sent.

- redline to OPP -- I would get this to them just as soon as possible, including changes as per OMB and NIOSH. I propose that we polish the document, if need be, while OPP is looking at it.
- when to send the redline to IARs will probably not be totally up to us.....I would anticipate that Lek/Ramona/Bob K. and Bob S. will be involved.
- I wouldn't anticipate another IASD meeting...call me crazy.

Am ccing Kacee.....

Becki, Darrell and Lynn,

We had a good meeting with OPP today re EtO.

The comment/response table and the prior meetings as done by Paul and Jennifer and others (Krista and Cheryl helped) seem to have done the trick.

They have a few desires for some greater documentation, such as tables in the body of the assessment that show the models considered and some statistics about their fit.

Paul will create a more detailed summary of the meeting topics.

They did say they want to see a redline, and I did not say we would not do so. I assume we will.
